

Everyday Maths

Shopping – shapes of food on shelves, counting vegetables into a bag, money to buy items, estimating how many items will fit in the shopper, heavy and light bag etc.

Dinner times – how many plates for the table, sharing food into groups, one more space to set for another friend at the table, how much squash will fit into the different sized cups etc.

Incidental – counting steps forwards and backwards, ordering numeral playing cards and saying what number comes next, ordering family shoes by size, talking about time and ordering daily events etc.

Walks – when enjoying a socially distanced walk you can look out for numbers (e.g. house numbers) or shapes in the environment (e.g. cylinder post boxes)

Board Games – develops maths skills as well as social skills!
